Autonomous Patrol 24/7

You have full control over patrol plans, routes, and times through the RMS backend platform. Aided by autonomous obstacle avoidance & charging using 3D LiDAR technologies, the Patrol is capable of patrolling in complicated indoor/outdoor scenarios unassisted.

4G/5G & WiFi Network

Titan Patrol can connect to 4G, 5G & Wifi, meaning it is capable of 360 degree HD video transmission.

Video Surveillance and Intelligent Analysis

Equipped with high-definition cameras with night vision, Titan Patrol is capable of facial recognition and analysis. The built-in IRT camera can help detect fires and set off an alarm when needed. The side and rear cameras can collect real-time images.

Remote Control

Your fleet of Patrol Robots can be controlled and monitored through the Robot Management System, allowing you to execute remote commands, issue remote warnings, capture videos as well as send and receive calls to the back-end platform.

Emergency Alarm

In case of emergency, users on site can call for help using the "SOS" button on every Patrol Robot and get immediate response from the security staff or the rlevant authorities.
